

Frontline Mini

Perfect for smaller, impromptu applications, this skid can be easily put on the back of a Ute and taken to the job site. Simple to use and easy to handle, this is ideal for light duty chem dosing applications like hyper chlorinating a newly installed main.

Standard Features:

- 60L Chemical storage tank
- 200L Chemical containment bund
- Tinted clear flip lid splash cover
- 1 x 7.5L/hr digital dose pump
- Foot valve, pressure loading valve, suction hose and fittings
- 50m of braided chemical dose hose and injection quill

Optional Extras Available:

- Increase in dosing pump size: *specify Dose Rate:* _____
- Dose pump auto start/stop pack with flow switch, control cable and junction box
- Handheld transfer pump for transferring chemicals from carboys to chemical storage tank
- Chemical Spill Kit

To order, please fill in your details below, select any optional extras you'd like, and email the completed form to sales@westwater.com.au.
